<b>23. Problem: (use additional Sheets if necessary)</b> Sun continually issues new Solaris 8 patches to fix bugs and improve overall system performance. ECS needs to deploy them to the sites periodically to mitigate operational risks. In addition, new Solaris 8 patches are needed to support upgrade of Netscape Communicator to v7.0 and JRE to v1.4. A delivery package has been prepared containing Sun's Solaris 8 Recommended Patch Cluster (11/11/02) and J2SE Solaris Patch Cluster (11/11/02). These patches have been regression tested against ECS custom code in the PVC and are ready for deployment to the sites.						
<b>24. Proposed Solution: (use additional sheets if necessary)</b> Deploy tar file Solaris_8_patches_2002-11-11.tar.gz to the sites, and install the patches it contains on all Solaris 8 machines. Tar file info: Solaris_8_patches_2002-11-11.tar.gz      checksum: 3815700737      size: 115398256						
<b>25. Alternate Solution: (use additional sheets if necessary)</b> None						
<b>26. Consequences if Change(s) are not approved: (use additional sheets if necessary)</b> Not installing these patches forestalls improving the site's operating environment and correcting known problems, including some related to security. It also increases the likelihood that subsequent releases of ECS COTS and custom software may malfunction as this patch level is used in the EDF for custom code and COTS testing.
